

Preparing For A Road Trip

A road trip is a great way to see the country. Prior to embarking on your adventure there are a few things you should consider.

- Begin with simple car maintenance:
 - Tune up and change the oil.
 - Watch for terminal corrosion on the battery and make sure all connections are clean and tight.
 - Ask your technician to test your battery. This type of test can be performed quickly by most automotive service centers.
 - If the car is difficult to start, have the vehicle's electrical system checked, and if any component is marginal, it's probably time to get a replacement component.
- Next, Make sure you have an Emergency Kit on board
 1. Assortment of Combination Wrenches, Screwdrivers, and Pliers
 2. Flashlight / Spare Batteries for Flashlight
 3. Roadside Flares / Battery Operated Roadside Marker Lights
 4. First Aid Kit
 5. Battery Jumper Cables
 6. Blanket, Food, and Something to Drink
 7. Cell phone charger
 - Note: The NASCAR® Extreme and NASCAR® Select series of batteries have a FREE 1-800 jumpstart if you need help on the road for the duration of the Free Replacement Warranty Period – 40 months for NASCAR® Extreme and 30 months for NASCAR® Select.
- Once everything is in order, get ready to enjoy your trip. Don't forget the map!
